Mauao Operational and Maintenance s 7(2)(f)(ii)	November 2007 - The stone steps and the Oruahine track upgrades have been completed now with excellent feedback. - Abseilers have been completing weed control on the bluffs above the Oruahine track and the Waikorire track. - Spring weed control has been completed in the pasture areas. - A larger sum of money (\$500,000) has been asked for to upgrade the base track in the annual plan submission. - Over hanging rock has been identified as a hazard and will be removed. TCC	Transit house are working well on Mauao. They are very cost effective way of reverting weed areas back into native vegetation. The area they have been working on has had 60+ Pohutukawa and 400 re-veg plants planted. All completed by volunteers. The pindone poisoning program went well with a good reduction of rabbits. There will be regular night shoots to keep the numbers down. Forest and Bird have provided volunteers to fill bait stations for rodents. I provided them with 30 traps and the bait. Excellent results so far.	s 7(2)(f)(ii)
