

Proposed planting for Mauao—Base Track

Most plants are to be planted at least one and a half metres from fences and two metres from track edges. The *Muehlenbeckia* may be planted one metre from the track edge and in large groups to simplify weed control. Larger growing species are to be planted in the gully's and on the lower slopes. Mountain flax and pohuehue can be planted on the upper, flatter areas to preserve views.

300 *Muehlenbeckia complexa* to fill this bank.

Fill this area with Mountain flax, keeping at least two metres from the track edge.

Add 200 *Muehlenbeckia complexa* to the existing patch to make one large group. Plant Mountain flax on the upper, flatter areas to preserve views.
