Urgent meeting to discuss unstable rock on Mauao

At the last Mauao steering group meeting in August a discussion was held regarding an unstable rock on Mauao. At this meeting a decision was made that if the rock is a safety concern it should be removed.

Avalon were brought in to assess the situation and confirmed the rock is unstable. They have recommended the rock should be removed by blasting. Concerns regarding this method of blasting have been raised and upon request we have asked Avalon to investigate and report if there are any alternatives.

Due to safety concerns and the increase in the use of Mauao over the summer we would like to discuss this issue further with you and make a decision on appropriate action. We need to achieve a solution by mid December.

We therefore invite you to attend a meeting:

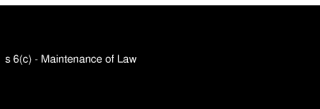

Date:

Time:

Location:

If you require any further information in the meantime please do not hesitate to contact me on 577 7000.

Yours sincerely,
